

## **Network Report**

**(Effective July 1, 2006)**

***All fees are U.S. dollars.***

A network report assists companies with more than one publication by providing advertisers with aggregate circulation of those publications. Conducted in conjunction with or supplemental to the circulation audit, a network report consolidates business/occupational demographics, qualification sources, and geographic distribution.

No additional auditing charges are incurred for a Network Report. Please refer to our E-Services pricing for the costs of printing a Network Report.
